

R2000 robustOS

Industrial Dual SIM Cellular VPN Router
2 Eth + 2 SIM

INTRODUCTION

The Robustel R2000 Industrial Dual SIM Cellular Router is a rugged, versatile 4G router with dual Ethernet ports, dual SIM capability and a range of advanced functions for mission critical IoT or M2M applications. 802.11n Wi-Fi client and AP capabilities.

The R2000 runs on Robustel's own Linux based Operating System, **RobustOS**. Developed entirely in-house, this gives way to a very high standard of technical support and high reliability. Many unique software innovations are built on top of RobustOS, these include:

RobustVPN – highly flexible hosted VPN service so customers can easily enjoy a “fixed IP router”

Data Guard – invaluable failsafe in case of a system failure and runaway data usage

Smart Reboot – SMS tool to push roaming SIMs from a non-working to working state

Smart Roaming - provides you with Device assisted intelligent network selection for roaming SIMs to improve performance and reduce risk.

RCMS is Robustel's free router cloud monitoring service that is fully compatible with the R2000. It allows customers to see a location overview of their routers quickly and simply on a map. Features such as data usage, signal strength, current network and much more can then be viewed on a per router basis. Over-the-air updates are supported for firmware, router configuration and Apps serving as essential ‘insurance’ if anything was not quite right during deployment.
